2. What the model receives

Type 2 diabetes, South Asian participants, European-only training. One sharing group.
Each row is one score. The label panel gives the score, then the European label, then the non-European label.

Score and both labels

PGS004106	EB + FinnGen + HUNT + UK Biobank	Genes & Health + UK Biobank
PGS000330	All of Us	UK Biobank

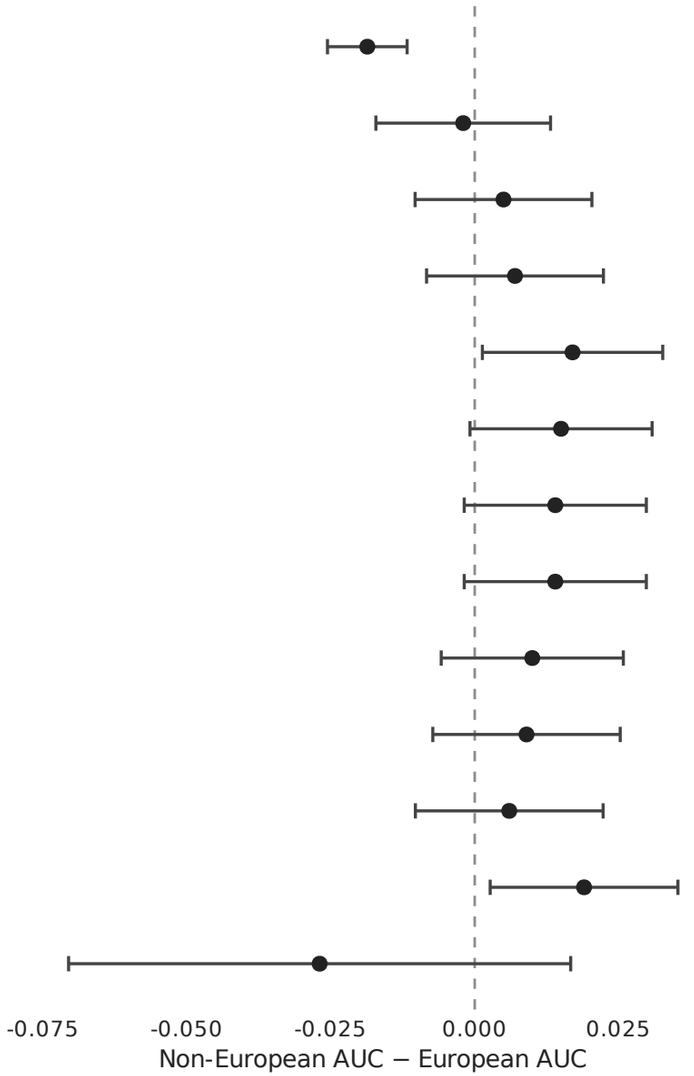
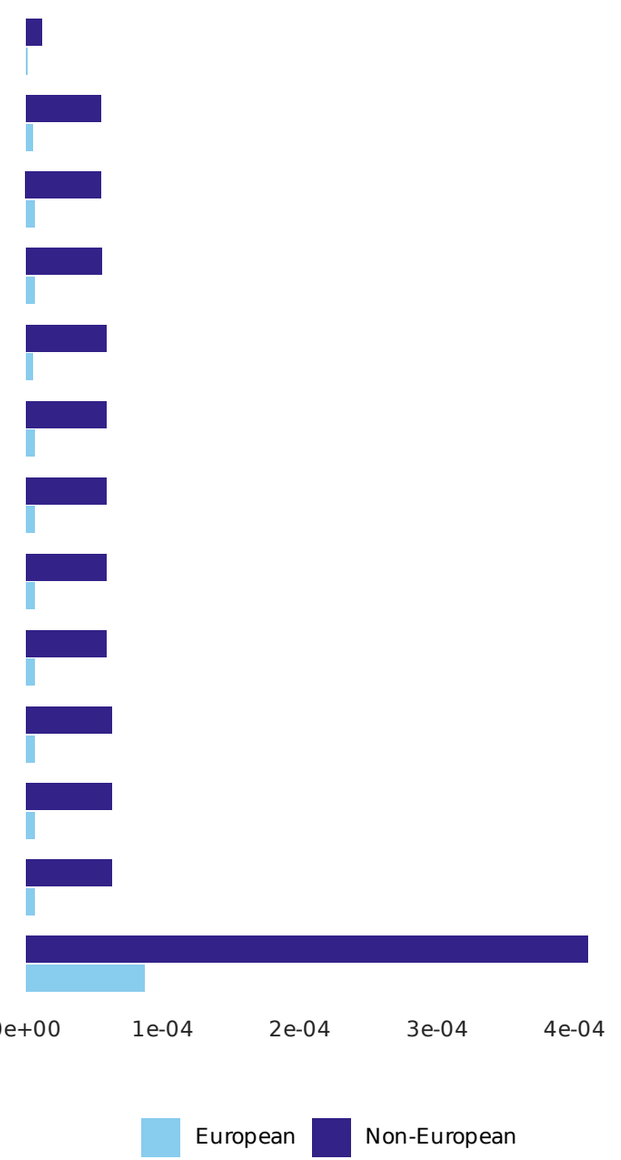
Ancestry difference



Variance, standard error squared



The non-European variance is the wider bar for every score, so that side dominates the variance of the ancestry difference.
