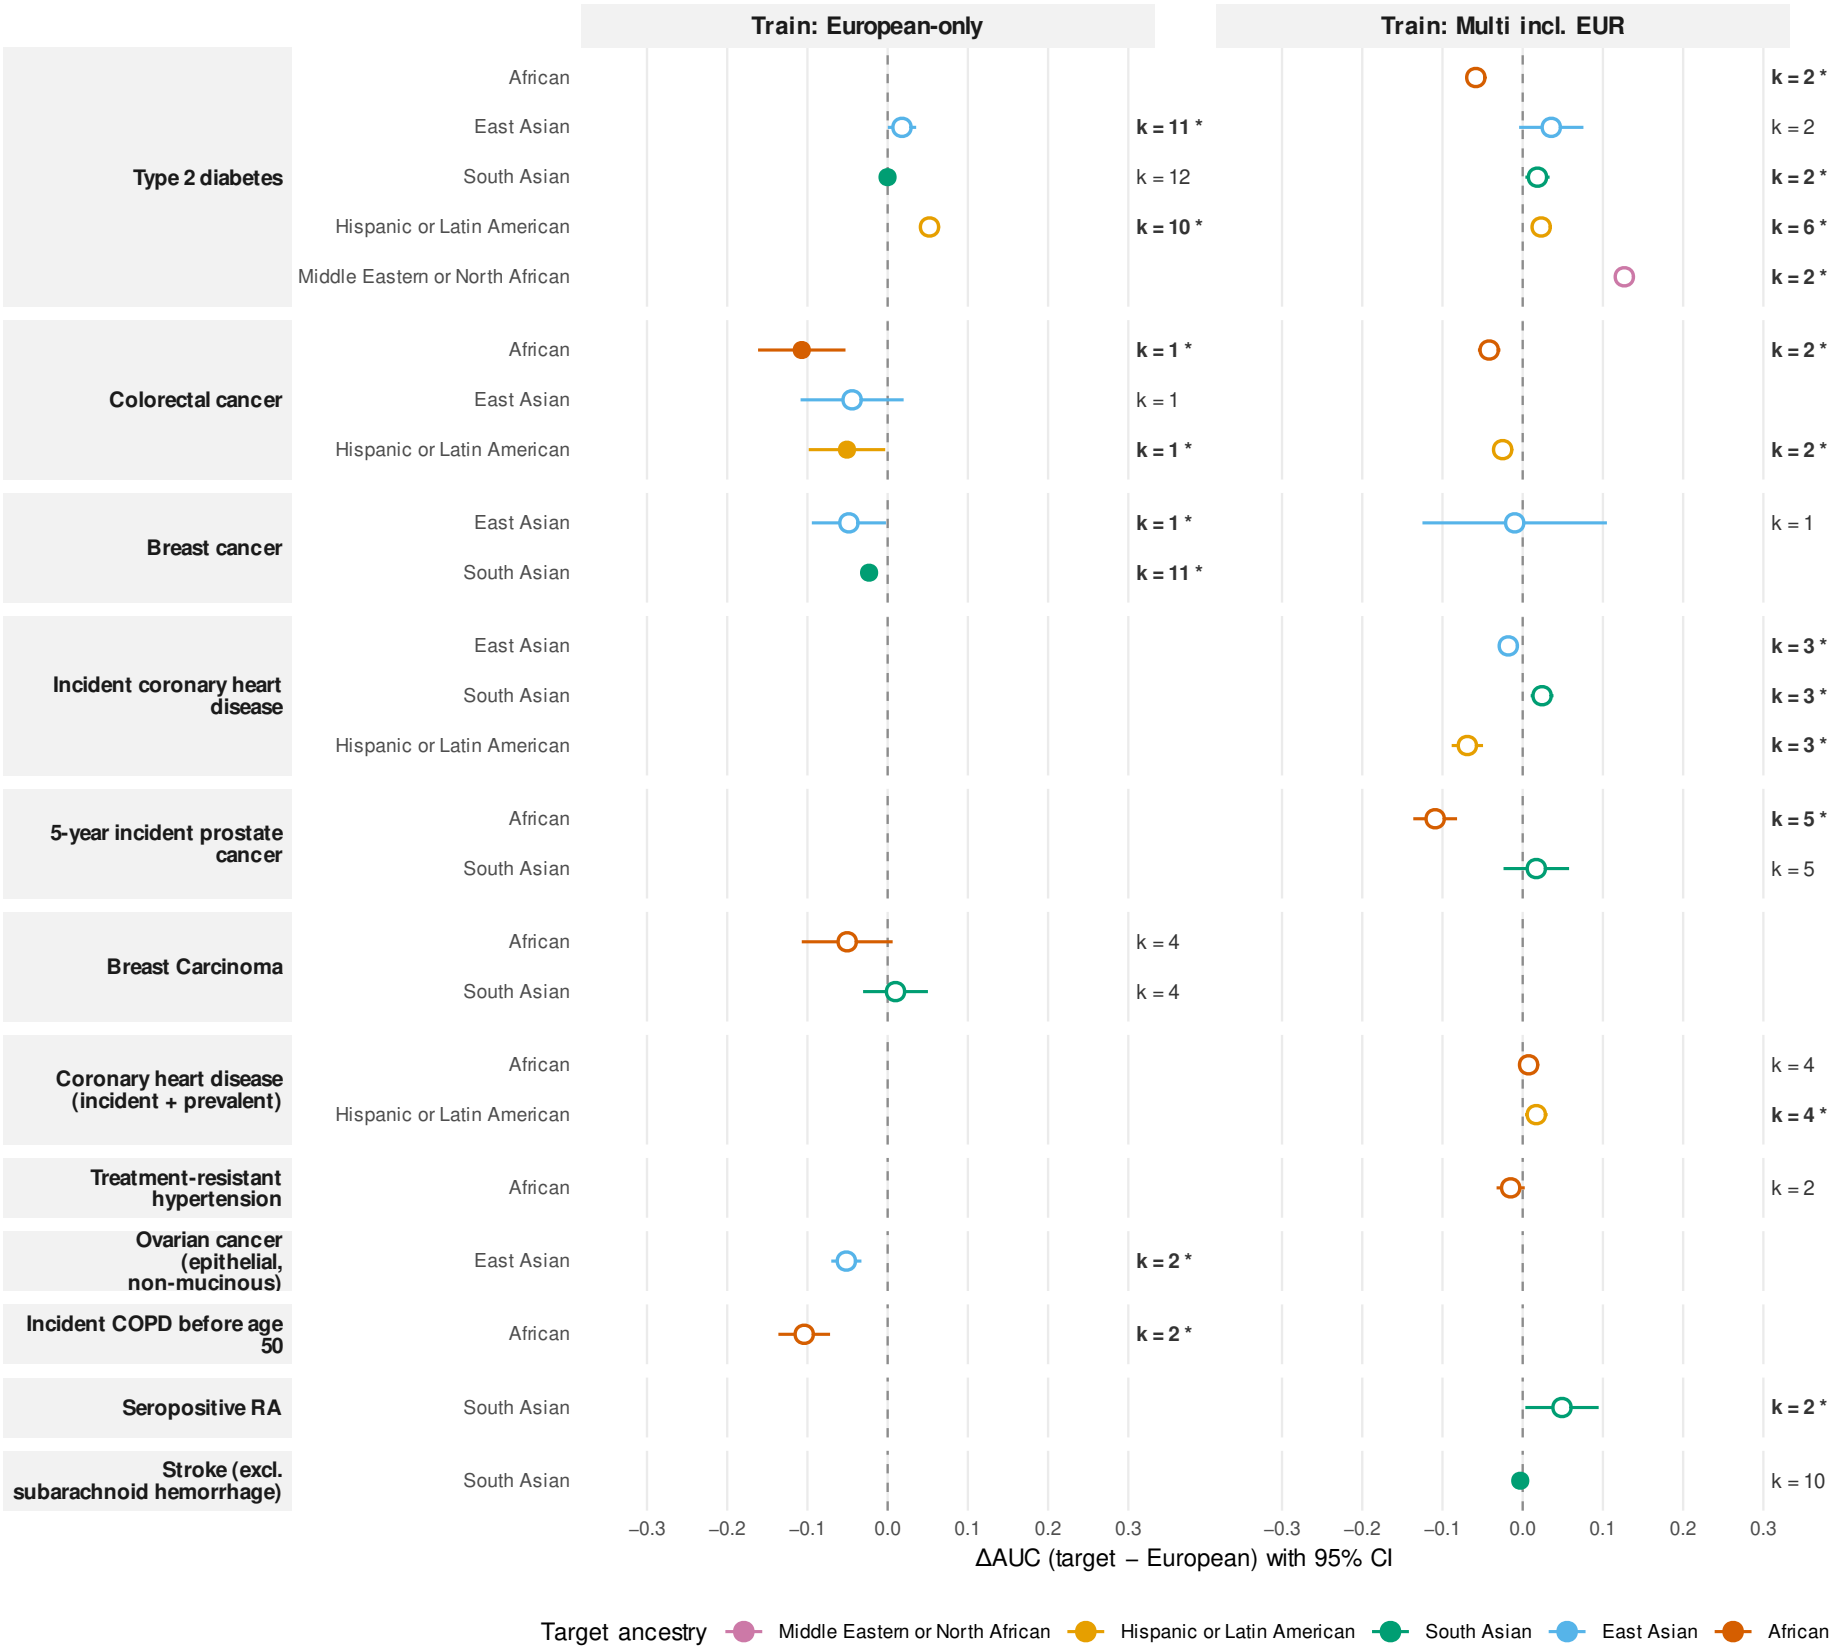
Figure 1C ΔAUC by training bucket

30 cells; 20 with 95% CI excluding zero (delta-method SE).



Same cells as deltaAUC_forest_faceted_20260923. k = number of PGS with a paired European/target estimate; * = 95% CI excludes zero.
Hollow points: every PGS in the cell has a single evaluation on each side (no Stage-1 pooling).
