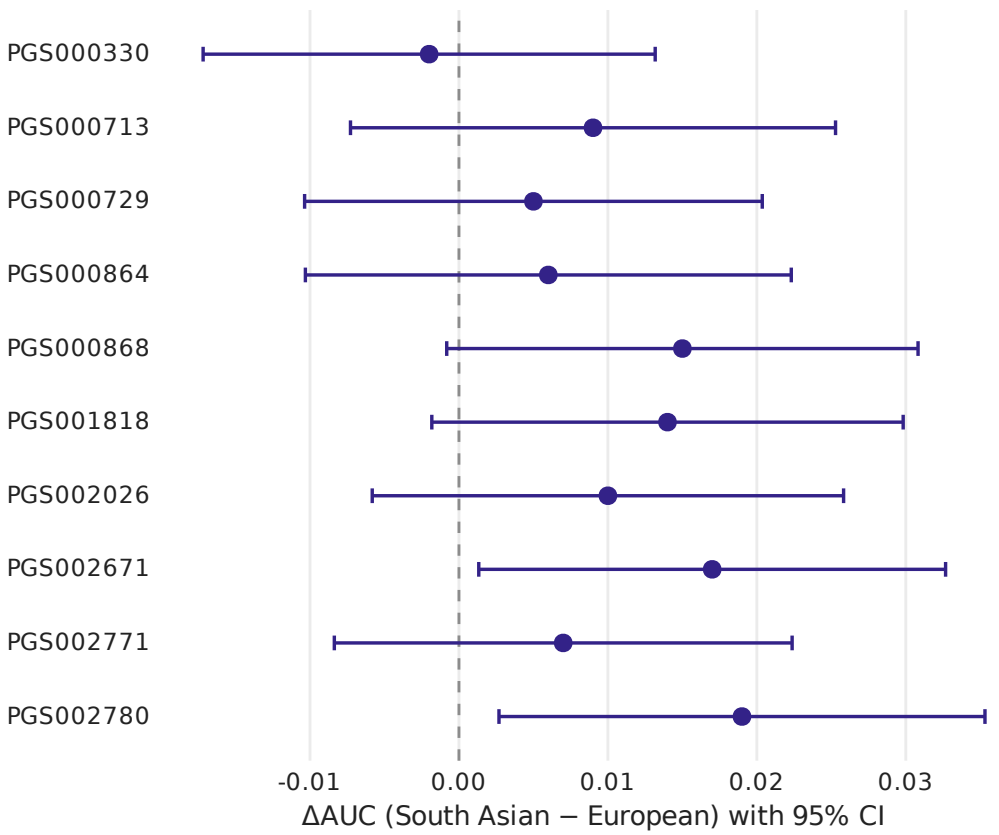
1.2 Stage 1 is not one score per sample set

Left: Stage 1 keeps one evaluation per score, sample set, and ancestry group. Different scores on PSS011749 all stay.
Right: the same ten scores, with the one score kept, All PGS IVW, the tightest interval, and Nikolaus's lmer.

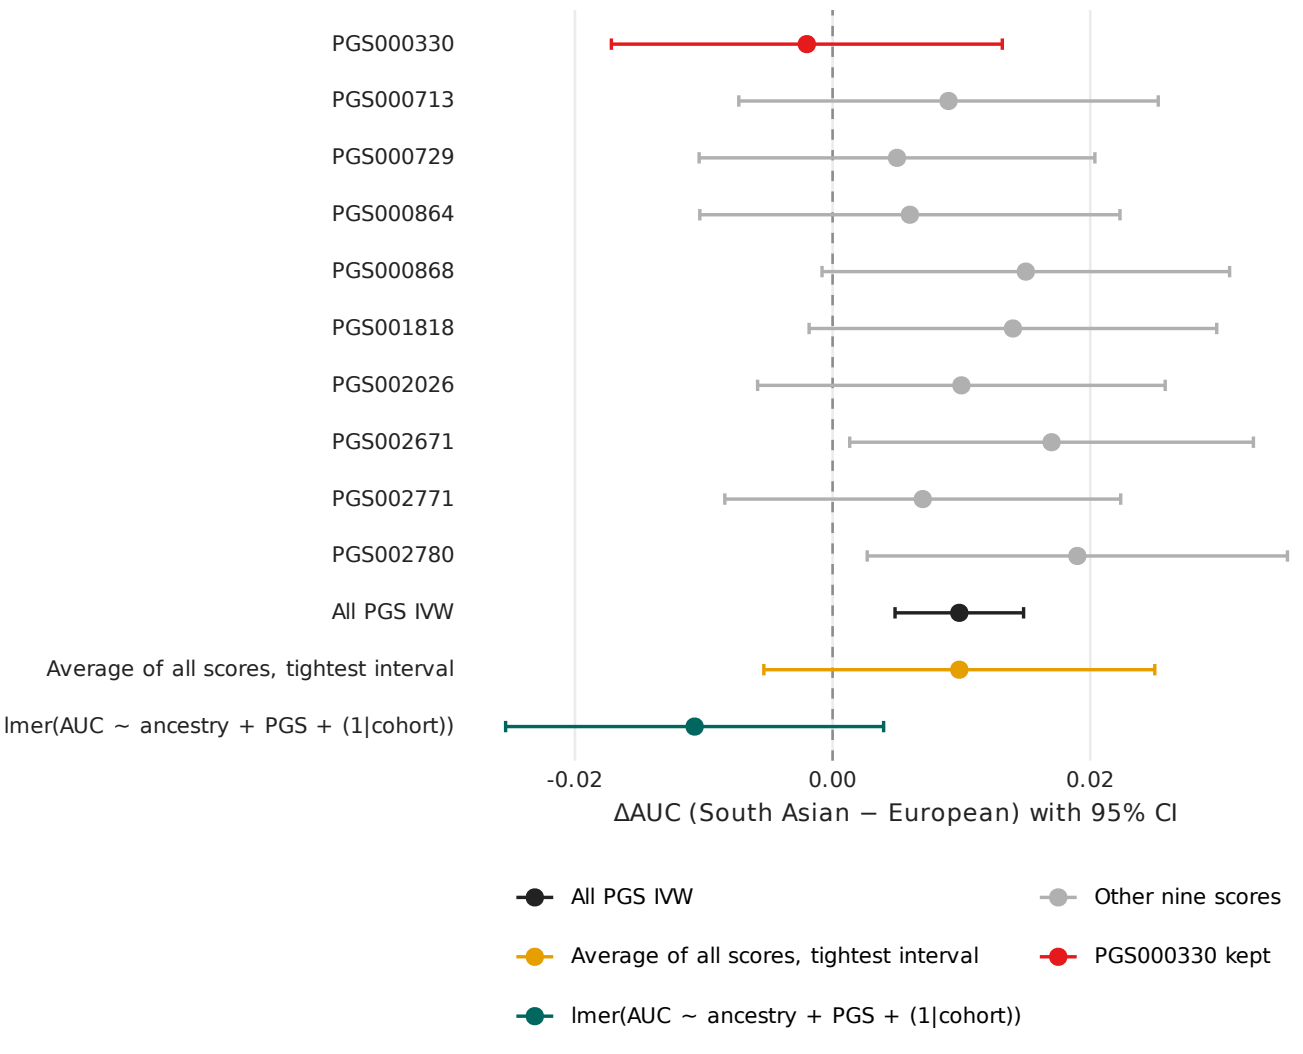
Stage 1 keeps all ten

PSS011749, South Asian participants.
One evaluation for each of these ten scores.



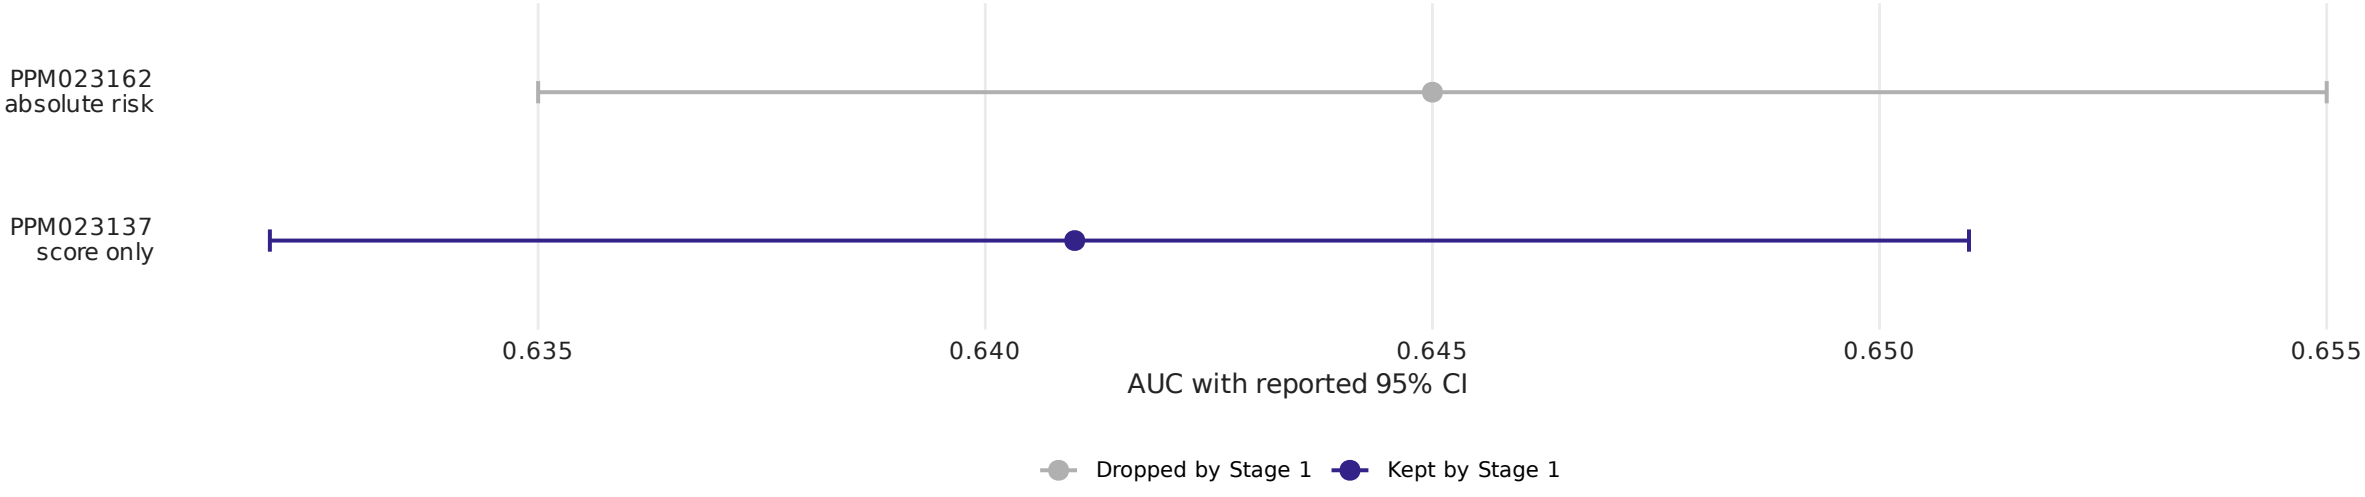
One score kept, All PGS IVW, tightest interval, and Nikolaus's lmer

Same ten scores as on the left, all on PSS011749.
The orange row keeps the All PGS IVW average and uses the smallest standard error. No score is dropped.



What Stage 1 does drop

PGS005345, PSS012140, European participants.
Same score, same sample set, two evaluations.



Catalog stamp 20260923. The orange interval is the average of these ten scores, 0.010, with the smallest standard error, 0.0077, from PGS000330. On this sample set that is also the score the i
The green row is Nikolaus's lmer from the European-only fit. This figure is not on the page for Georg.
