1. Which comparisons can use the sample-set term

Each row is one comparison: one trait, one training set, and Europeans compared with the ancestry group named here.
The top panel uses more than one target sample set. The middle panel does not. The bottom panel has one PGS.

Several target sample sets

Type 2 diabetes — African, Multi-ancestry training

Type 2 diabetes — South Asian, Multi-ancestry training

Type 2 diabetes — East Asian, Multi-ancestry training

Type 2 diabetes — Middle Eastern or North African, Multi-ancestry training

Type 2 diabetes — Hispanic or Latin American, Multi-ancestry training

Breast cancer — South Asian, European-only training

Type 2 diabetes — East Asian, European-only training

Type 2 diabetes — South Asian, European-only training

One target sample set

Apparent Treatment-Resistant Hypertension — African, Multi-ancestry training

Colorectal cancer — African, Multi-ancestry training

Colorectal cancer — Hispanic or Latin American, Multi-ancestry training

Epithelial non-mucinous ovarian cancer — East Asian, European-only training

Incident chronic obstructive pulmonary disease before age 50 years — African, European-only training

Seropositive RA — South Asian, Multi-ancestry training

Incident coronary heart disease — Hispanic or Latin American, Multi-ancestry training

Incident coronary heart disease — East Asian, Multi-ancestry training

Incident coronary heart disease — South Asian, Multi-ancestry training

Breast Carcinoma — African, European-only training

Breast Carcinoma — South Asian, European-only training

Coronary heart disease (incident and prevalent) — African, Multi-ancestry training

Coronary heart disease (incident and prevalent) — Hispanic or Latin American, Multi-ancestry training

5-year incident prostate cancer — African, Multi-ancestry training

5-year incident prostate cancer — South Asian, Multi-ancestry training

Stroke excluding subarachnoid hemorrhage — South Asian, Multi-ancestry training

Type 2 diabetes — Hispanic or Latin American, European-only training

One PGS

Breast cancer — East Asian, European-only training

Breast cancer — East Asian, Multi-ancestry training

Colorectal cancer — African, European-only training

Colorectal cancer — Hispanic or Latin American, European-only training

Colorectal cancer — East Asian, European-only training

Catalog stamp 20260923. In (1|cohort), cohort means the sample set.
Stroke is in the middle panel. It uses two South Asian sample sets, and every PGS uses both, so those sample sets are not separate from the ancestry group.
This list is not on the page for Georg.
