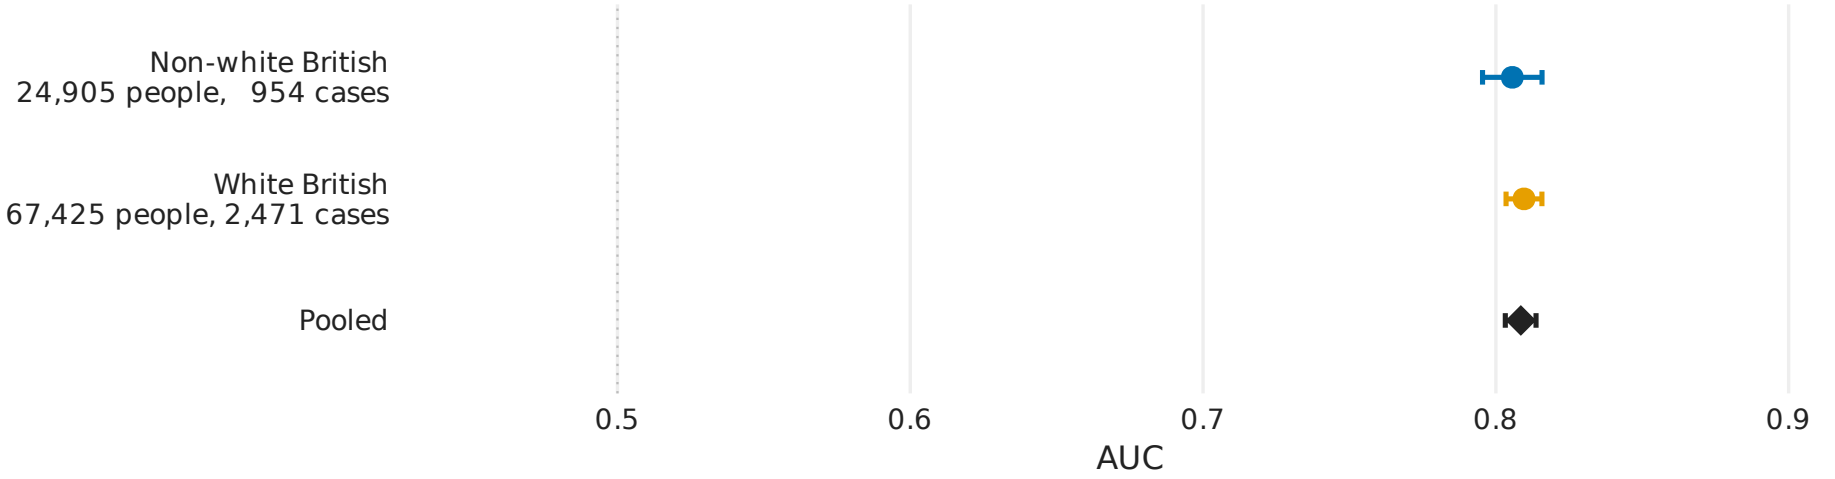
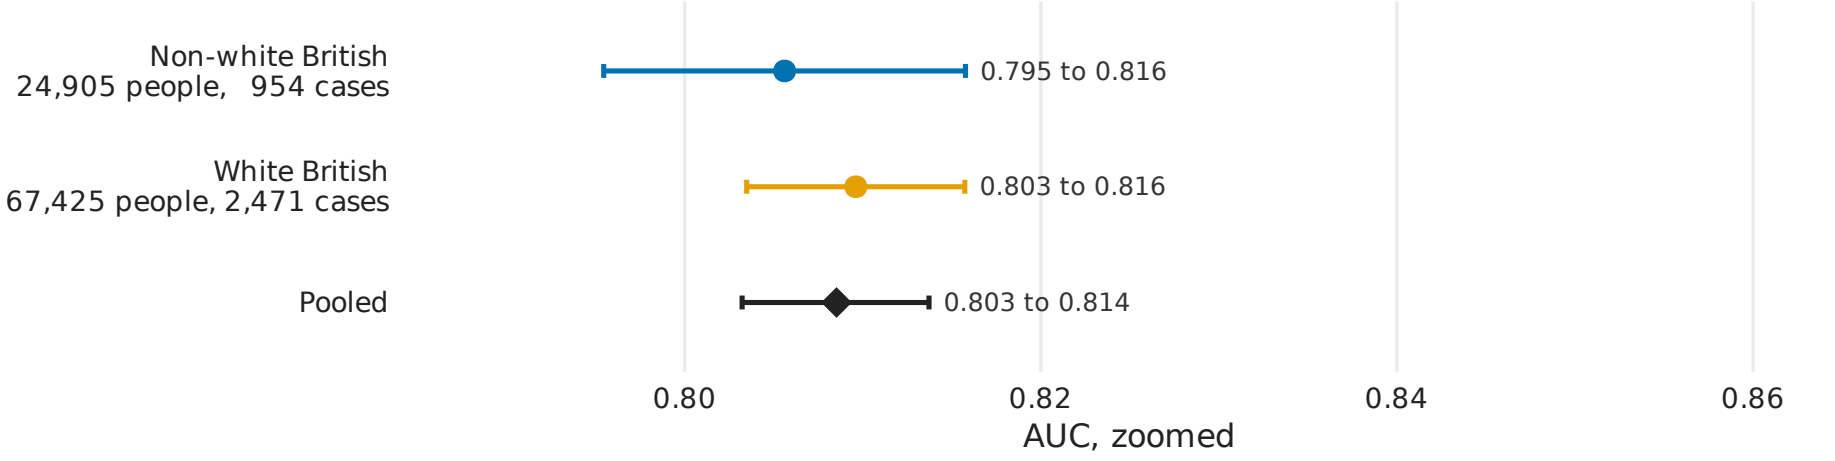
1. The two European evaluations of PGS001336

Breast cancer. Stage 1 compares evaluations that share a score and an ancestry.
East Asian and South Asian each have one evaluation of this score, so they have no Q.



Points are the reported AUCs. The intervals are real, but at this scale they are thinner than the points.
The dotted line is AUC = 0.5, a score with no discrimination. Both studies, and the pooled diamond, sit near 0.81.

The same three intervals, zoomed


Each study interval covers the other study's point estimate. That is the pattern Q will call agreement.
