Scores in comparisons that include both kinds

Each point is one score. The European side and the non-European side use the same covariate class.

ΔAUC (non-European – European) with 95% CI

Uses covariates Does not use covariates

These are the comparisons whose average includes a score with no covariates and a score that uses covariates. Does not use covariates: both sides are None (PRS only). Uses covariates: both sides include covariates. Age, sex, and principal components count as covariates.
